nwsldt22
Drop table
deltab_nw_sl_event_temp.sql

nwsldt23
Drop table
deltab_nw_sl_slam_temp.sql

nwslmss1
End On Demand

Note This stream would be requested by the User only when the User results table is to be re-built during the day. This table is already re-created each day by the daily batch stream.

This would only be a requirement when the User changes the Service Level parameter tables and wishes to see the changed results before the next scheduled daily processing completes.

Stream rolls in every day and waits on an operator confirm on job nwslta22. If the stream is run it will re-schedule itself automatically ready for the next run.
