

Problem Loans (PB) Accounting- OPC Scheduling

Last Updated Date: 17/08/10 By: SC
T:\FS_Information_Technology\DWHSE\WAREHOUS\BUILD\DATAFLOW\Pb\Opcpb30.vsd

Run Cycles
1. Runs on the last Business day of the Week or the last business day of the Month. (Use the National Calendar).
2. Runs on the last Business day of the Week. (Use the National Calendar).
3. Runs on the last Business day of the Month. (Use the National Calendar).

* **Note1:** Update job **nwpbui31** runs after **nwpbsv31** in order to avoid circular dependencies in tb and mb streams. **nwpbui31** updates two columns in **nw_pblm_accounting** table that are not required by consecutive jobs.

Note2: Drop table jobs **nwpbdt28** and **nwpbst30** were modified so that they won't abend if coressponding tables are not found. This situation may occur if weekly and monthly streams are running very close and monthly stream is delayed for whatever reason.
