Note Each user that will reference the data dictionary on NWP1 -
a) Must logon through NWP1
b) Reference the data dictionary through the synonyms/views provided. This will be forced by the fact that the user is referencing the data through a Microsoft Access front end.

Note
The source SQL statements used to do the initial setup of the views and grants can be found in **data_dictionary_update_setup.sql**

The Microsoft Access Front End is owned and maintained by
GDW Decision Support Manager
