

NT Server Back Ups - Systems Flow (Flown002da)

Subject Area: N0

Run Cycle: Daily (every calendar day)

Calendar: Group: NWN0D

Created by: Alex Booth

Last Updated:- 29 Dec 2006 By: Haydn

Lee Files on the HP Unix NWCognosServer01 machine are located in directories -

- /var/opt/wh_prod/n0/NTbackups
- /var/opt/wh_prod/n0/NTbackups_all

These directories have a UNIX link pointing to them from a directory that is mapped back to the PC servers.

These directories are then visable to the PCs/Servers. There are two UNIX links set up from the mapped (PC visable) drive to the physical files -

- /var/opt/sw/nw/abccube/ is the directory that is mapped as being visable from the NT servers as -
\\NWCognosServer01.unix.srv.westpac.com.au\cube_link .

/var/opt/sw/nw/abccube/links: ll *NT*
lrwxrwxr-x 1 nwsupp NWCognosServer 29 May 4 13:24 NTbackups -> /var/opt/wh_prod/n0/NTbackups
lrwxrwxr-x 1 nwsupp NWCognosServer 33 May 4 13:22 NTbackups_all -> /var/opt/wh_prod/n0/NTbackups_all
