Created By: RT Date: 08/12/06
Last Updated By: Nancy Lam Date: 18/06/08
Updated Info: [Changes for jobs to be hooked via unique conditions](#)
T:\FS_Information_Technology\DWHSE\WAREHOUS\BUILD\DATAFLOW\zb\opc_zb.vsd

Business Day 4 Process:

NWPROD80: Table NWZBCM is dynamically loaded in by job nwgrfj04
Job nwzbmsm1 (Table: NWZB) is dynamically loaded in by nwgrfj04
CXPROD01: Table NWZBCM is dynamically loaded in by job nwgrfj02
Job nwgrdum4 (Table: NWGRCUBE) is forced in by job nwgrfj02

NOTE:

- All jobs issue unique out conditions.
- The unique conditions are cleaned up by the receiving jobs
- Job nwgrdum4 is Control-M dummy job, its purpose is to cleanup the unique out-condition for receiving job nwgrfj01, which does not run on BD5.
- Upon completion, job nwzbmsm1 deletes all unique out-conds issued from jobs nwzbft01 and nwzbft02, including those for receiving job nwzbmsm2

Business Day 5 – INTRADAY Process:

NWPROD80: Table NWZBCM is dynamically loaded in by jobs nwgrcj00
Job nwzbmsm2 (Table: NWZB) is dynamically loaded in by nwgrcj00
CXPROD01: Table NWZBCM is dynamically loaded in by job nwgrfj03
Job nwgrfj01 (Table: NWGRCUBE) is dynamically loaded in by job nwgrfj03

NOTE:

- All jobs issue unique out conditions.
- The unique conditions are cleaned up by the receiving jobs

- Upon completion, nwgrem02
Orders into the current plan job nwgrcj00 (TABLE: NWGRCUBE)
- Job nwgrfj01 is Control-M dummy job:
Orders into the current plan job nwgrfj03 (TABLE: NWGRCUBE)
- Upon completion, job nwzbmsm1 deletes all unique out-conds issued from jobs nwzbft01 and nwzbft02, including those for receiving job nwzbmsm1
